

## ATMOSFERA DINING TABLE

**MADE BY BY GUBI**

The tables' simple aesthetics maintain an understated poise with a nod to classic references without being too formal. The tabletops are made from rhythmic, repeating slats of solid, premium teak, enclosed by a frame made from the same slats, giving a minimalist feel. The table legs are formed from two vertical slats, using a miter joint that creates an inverted 'L-shape' on each corner. Referencing architectural and maritime design, the unusual leg design provides both structural support and visual interest, giving the piece a certain lightness. Each leg protrudes slightly above the tabletop surface, culminating in a rounded detail in contrast to the geometric lines of the structure, that gives a calm composure to the design.
