

BOCCI 93.1L SCULPTURAL CABLE

BY BOCCI

93 is created by pouring molten aluminum into a hand-blown glass vessel. As the metal moves and cools, it leaves behind a suspended trace of its flow, each piece preserving a single, unrepeatable moment.

Illuminated from within, light reveals the aluminum's oxidized contours and the subtle variations formed by heat and pressure. Every 93 is hand-formed in Bocci's Vancouver studio, resulting in subtle variations from piece to piece.

Dimensions

Diameter: +/- 11.5"

Material Options

Glass and aluminum
Black or nickel sculptural Cable
Available in a selection of canopy finishes and sizes (depending on wiring—contact your electrician)
Available in a selection of mounting point finishes

Lamping

Power — 12V low voltage. 2W LED
dimming — ELV dimming
CCT — 2700K
IP rating — IP30, suitable for dry locations
