

BOCCI 93.S/SP

BY BOCCI

93 continues Omer Arbel's investigation into the relationship between glass and metal. Molten aluminum is poured directly into a heated hand blown glass vessel, where it moves, oxidizes, and cools against the inner surface. The finished form preserves this encounter as a suspended trace of heat, gravity, and material response.

Dimensions

Diameter +/- 8"
Canopy
93s: Dia. 2.2"
93sp: Dia. 4.5"
93s Brass: Dia. 3" (please note 93S
Brass availability currently TBD)

Material Options

Materials: glass and aluminum
sp Backplate white or brushed brass

Lamping

*93s and 93s Brass MUST be remote
wired
Power – 12V low voltage. 2W
LEDDimming – ELV dimmingCCT –
2700KIP rating – IP30, suitable for dry
locations
