LAUREL SIDE TABLE

BY DE LA ESPADA

Laurel side table is composed of two pure geometric shapes, cone and cylinder, intersecting to create two wide and functional surfaces, distributed at different levels. In keeping with the other elements of the collection, the ratio of the materials used is 50/50, in this case painted and hand-polished hdf for the cone, that appears to balance weightlessly upon the cylindrical base, built with generous planks of timber sandwiched with alternating grain direction. The Laurel is also available in marble and as a coffee table.

Dimensions

W 12.5" x D 11.8" x H 15.75"

Material Options

Base available in American black walnut, American white oak, or European Ash in a range of finishes. Cone available in HDF in a choice of our full range of colors with a satin matte or gloss finish.
