

LUNA KALEIDO PENDANT

MADE BY BY GABRIEL SCOTT

Inspired by a lunar halo, the Luna Kaleido Large Pendant is a highly customizable modular light fixture which grows in every direction as its assembly system stems horizontally or vertically. Stacking color upon color of various mouth-blown glass shapes, the series has been designed to offer infinite interpretations of tone, shape and refracted light. Combining soft iridescent colors with patterned textures and delicately shaped glass beads from the selection found here.

The Kaleido Collection plays with texture, color and shape to distort light and create magical optical illusions when looking through the glass.
