Material Options

The upper and lower shelves of this bar cart are both useful and beautiful, especially in Dichroic glass, which brings in a mercurial, reflective quality that plays with the light as it filters through, casting expanses of technicolored luminosity across the floor below. You can choose from any of the standard, specialist, or 'Butterfly' finishes to make it sing in your space. Pair your with a Dichroic glass top and it's bound to be just as exciting as its contents.
