

VEIL PENDANT

MADE BY BY LADIES AND GENTLEMEN STUDIO

Veil employs a series of textile panels delicately draped over an elemental wooded framework - setting up a series of collaged soft textures and forms. When illuminated, a concealed internal light source further articulates this dynamic interplay through shadows, highlights, and diffusion. This complex effect achieved by simple means reflects L&G's desire to expose the genuine richness imbued in honest, natural materials. The studio views this as a means for nudging the definition of elevated design towards a more nuanced, mindful, and sensitive approach to craft and formgiving.
